

AbaClient Version 4.0

Installed AbaClients with activated update function will receive an automatic update notification within the next 14 days.

Please note before updating:

As of AbaClient Version 4.0, only Abacus versions from Version 2021 are supported. Older Abacus installations can no longer be started with this client.

Abacus Version 2026 requires the use of AbaClient Version 4.0.

Release notes:

Supported Abacus versions: From Version 2021

- Login is only possible via the standard web browser
- Java 8 has been removed
- Conversion from 32-bit to 64-bit
- JxBrowser has been removed
