

## AbaClient Version 4.2

Installed AbaClients with activated update function will receive an automatic update notification within the next 14 days.

### **Please note before updating:**

As of AbaClient Version 4.0, only Abacus versions from Version 2021 are supported. Older Abacus installations can no longer be started with this client.

Abacus Version 2026 requires the use of AbaClient Version 4.0.

### **Release notes:**

Supported Abacus versions: From Version 2021

- Removal of the option to import AbaStart shortcuts
- Removal of the 'Clear browser cache on startup' option in AbaClient Settings.
- Update Java versions to 17 and 21
- Automatic deletion of the .abalink file from the Downloads folder
